Introduction :

The primary objective of LogiWeb is to automate brokerage operations and create a transparent and efficient logistics workflow. The system enables clients to submit shipment enquiries online, allows dealers to submit competitive quotations, and helps administrators compare rates and assign shipments effectively.

Key Objectives:

- Automate brokerage operations
- Improve transparency
- Reduce manual errors
- Provide structured shipment management

Scope of the Project :

The system connects business clients with registered transport dealers through a centralized web application. It allows clients to submit shipment enquiries and enables administrators to compare dealer quotations and assign shipments efficiently.

The system supports:

- Shipment enquiry submission
- Dealer quotation management
- Shipment tracking
- Invoice and payment processing
- Dealer settlement handling

Technology Used :

Frontend

HTML5
Tailwind CSS
JavaScript

Backend

Node.js
Express.js
Three.js

Database

MySQL
FireBase

System Architecture :

System Features :

LogiWeb provides complete end-to-end functionality for managing logistics brokerage activities. It allows different users to interact through role-based access and ensures smooth coordination between clients, dealers, and administrators.

Major Features as of:

- Secure user authentication
- Shipment enquiry submission
- Dealer quotation management (from database)
- Quote comparison and selection
- Shipment creation and tracking
- Invoice generation
- Online payment processing
- Dealer settlement management

Functional Requirements :

The functional requirements define the operations that the system must perform. These requirements ensure that the complete shipment lifecycle is handled digitally from enquiry to final settlement.

- **The system shall:**
- Allow client registration and login
- Enable enquiry submission
- Allow dealers (database) to submit quotations
- Enable admin to compare and generate final quote
- Create shipment after client approval
- Generate invoice and process payment
- Process dealer settlement

Non-Functional Requirements :

Non-functional requirements define the quality standards of the system. These ensure that LogiWeb performs efficiently, securely, and reliably under normal operating conditions.

System Quality Attributes:

- Response time less than 3 seconds
- Support minimum 50 concurrent users
- Encrypted password storage
- Role-based access control
- SQL injection prevention
- 24/7 system availability

Data Dictionaries:

1. User Table

Field Name	Data Type	Size	Key	Description
user_id	INT	11	PK	Unique user ID
name	VARCHAR	100		Full name
email	VARCHAR	100	UNIQUE	Login email
password	VARCHAR	255		Encrypted password
role	VARCHAR	20		client / dealer / admin
created_at	DATETIME			Account creation date

2. Dealer Table

Field Name	Data Type	Size	Key	Description
client_id	INT	11	PK	Unique client ID
user_id	INT	11	FK	Reference to user table
company_name	VARCHAR	150		Company name
gst_number	VARCHAR	20		GST number
address	TEXT			Company address

3. Dealer Table

Field Name	Data Type	Size	Key	Description
dealer_id	INT	11	PK	Unique dealer ID
user_id	INT	11	FK	Reference to user table
company_name	VARCHAR	150		Dealer company name
route_coverage	VARCHAR	200		Operating routes
multiplier	DECIMAL	5.2		Pricing multiplier
rating	FLOAT			Dealer rating
status	VARCHAR	20		Active / Inactive

4. Admin Table

Field Name	Data Type	Size	Key	Description
admin_id	INT	11	PK	Unique admin ID
user_id	INT	11	FK	Reference to user table
role_type	VARCHAR	50		Admin role

5. Service Table

Field Name	Data Type	Size	Key	Description
service_id	INT	11	PK	Unique service ID
service_name	VARCHAR	100		Service name
description	TEXT			Service description

6. Enquiry Table

Field Name	Data Type	Size	Key	Description
enquiry_id	INT	11	PK	Unique enquiry ID
client_id	INT	11	FK	Linked client
service_id	INT	11	FK	Linked service
pickup_location	VARCHAR	150		Pickup city
delivery_location	VARCHAR	150		Delivery city
cargo_type	VARCHAR	100		Type of goods
weight	DECIMAL	10.2		Cargo weight
volume	DECIMAL	10.2		Cargo volume
preferred_date	DATE			Shipment date
status	VARCHAR	50		Enquiry status
created_at	DATETIME			Creation date

7. Dealer Quotation Table

Field Name	Data Type	Size	Key	Description
quotation_id	INT	11	PK	Unique quotation ID
enquiry_id	INT	11	FK	Linked enquiry
dealer_id	INT	11	FK	Linked dealer
quoted_price	DECIMAL	12.2		Dealer price
transit_days	INT			Estimated days
remarks	TEXT			Additional notes
created_at	DATETIME			Submission date

8. Final Quotation Table

Field Name	Data Type	Size	Key	Description
final_quote_id	INT	11	PK	Unique final quote ID
enquiry_id	INT	11	FK	Linked enquiry
selected_dealer_id	INT	11	FK	Chosen dealer
final_price	DECIMAL	12.2		Final price
broker_margin	DECIMAL	12.2		Broker profit
status	VARCHAR	50		Accepted / Rejected
created_at	DATETIME			Generated date

9. Shipment Table

Field Name	Data Type	Size	Key	Description
shipment_id	INT	11	PK	Unique shipment ID
enquiry_id	INT	11	FK	Linked enquiry
dealer_id	INT	11	FK	Assigned dealer
shipment_status	VARCHAR	50		Current status
created_date	DATETIME			Shipment date

10. POD Table

Field Name	Data Type	Size	Key	Description
pod_id	INT	11	PK	Unique POD ID
shipment_id	INT	11	FK	Linked shipment
file_path	VARCHAR	255		Document location
upload_date	DATETIME			Upload timestamp

11. Invoice Table

Field Name	Data Type	Size	Key	Description
invoice_id	INT	11	PK	Unique invoice ID
shipment_id	INT	11	FK	Linked shipment
client_id	INT	11	FK	Linked client
total_amount	DECIMAL	12,2		Invoice amount
gst_amount	DECIMAL	12,2		Tax amount
payment_status	VARCHAR	50		Paid / Pending
invoice_date	DATE			Invoice date

12. Payment Table

Field Name	Data Type	Size	Key	Description
payment_id	INT	11	PK	Unique payment ID
invoice_id	INT	11	FK	Linked invoice
amount_paid	DECIMAL	12.2		Paid amount
payment_mode	VARCHAR	50		Payment method
payment_date	DATETIME			Payment date
transaction_id	VARCHAR	100		Gateway reference

13. Settlement Table

Field Name	Data Type	Size	Key	Description
settlement_id	INT	11	PK	Unique settlement ID
shipment_id	INT	11	FK	Linked shipment
dealer_id	INT	11	FK	Linked dealer
dealer_amount	DECIMAL	12,2		Amount paid to dealer
settlement_date	DATETIME			Settlement date
status	VARCHAR	50		Paid / Pending

Future Scope :

LogiWeb can be enhanced further to support advanced logistics features and commercial-level scalability. Future improvements can make the system more intelligent and market-ready.

Future Enhancements:

- Real-time GPS tracking
- AI-based dealer selection
- Mobile application version
- Live shipping API integration
- Advanced analytics dashboard

Conclusion :

LogiWeb successfully automates the traditional logistics brokerage process through a structured web-based platform. It improves operational efficiency, ensures transparency, and maintains secure financial transactions.

The system demonstrates practical implementation of modern web technologies and provides a strong foundation for future expansion.
